Learning Opportunity

If you have been implementing parts of Building a Thinking Classroom and you would like to hear from a high school math teacher about his journey, please join us at Nelson Mandela High School to **see and experience** elements of the BTC in a high school mathematics classroom. Besides some concrete examples, Kevin will share his goals around BTC, how this teaching method looks different in different classes and how he integrated BTC ideas into his own context and philosophy.

Presenters

Kevin Weimer

Kevin Weimer is currently teaching high school math at Nelson Mandela High School.
