Program

EDUCATING AS A COMMUNITY: PARENT MATH NIGHT

Join Jennifer Plosz for a PARENT/TEACHER MATH NIGHT geared towards Kindergarten to grade 3 mathematics. Research has shown that rote memorization does not develop the necessary foundation for higher level mathematics. So, what is the alternative? Mathematics is a make sense subject. If it does not make sense to a child they will not develop the necessary foundations for upper level mathematics. What do you do? Come for a parent only math night and learn at-home activities to develop number sense.

This learning opportunity is being offered through curriculum implementation funding from Alberta Education.

Presenters

Jennifer Plosz

, originally started out as a high school mathematics teacher, but has spent the last 10 years studying and working with students in the elementary grades. She is currently a master's candidate in the Werklund School of Education at the University of Calgary. Her research interests include visualization and its role in cultivating the growth of mathematical understanding. This area of study contributes to a secondary area of interest – students with learning challenges. She

is also a research assistant in a SSHRC- funded project on mathematics experiences, images and identities (PI: Dr. Jo Towers), as well as in a project on remediation for students with learning disabilities in spatial cognition (PI: Dr. Michelle Drefs).
