Learning Opportunity

TARGET AUDIENCE: GRADES 4-9 TEACHERS ARE ENCOURAGED TO ATTEND

In this one hour webinar, you will hear from the Alberta teachers who developed **PEEL** (People for Energy and Environmental Literacy), an inquiry based curriculum that builds the **21 Century learner competencies** our students need to address the complicated topic of **climate change**.

Learn the science, the social impacts, and the proven approach needed to teach this layered subject successfully as you **meet curriculum outcomes** through **inquiry**, hands on **STEM** activities and a **action based project** approach.

After the webinar, PEEL provides ongoing support as you adapt the **11 comprehensive lesson plans**, **project ideas**, and **assessment tools** provided for your particular classroom context through the teachpeel.ca website.

Empower your students to recognize the impact of their actions now and in the future!

This learning opportunity is being offered through curriculum implementation funding from Alberta Education.

Presenters

Christine Avey

has over 16 years teaching experience with grades 3-6. She specializes in gifted education, and has Public and Charter experience in Alberta.

Cayley Webber

has been teaching grades 3-6 for 6 years. She specializes in gifted and outdoor education, and has Public and Charter experience in Alberta.

Paula McGarrigle

is the managing Director of a consulting company in sustainability and renewable energy.
