## Program

**TARGET AUDIENCE: K-9 TEACHERS, DISTRICT LEADS, EDUCATIONAL ASSISTANTS AND OT/PT/SLP ARE ENCOURAGED TO ATTEND**

"Do you believe all learners should be challenged and rewarded for taking risks and perseverance? Do you believe all students can learn and be successful? Do you believe it necessary to assist students in building self efficacy and resilience?"

If you answered yes to any or all of the questions then this is a learning opportunity designed just for you.

In this session you will discover your own ability to expand your mind and develop your own growth mindset while uncovering the secrets of the locked box, and solve the puzzles to escape the room! Come prepared to accept the challenges that await while uncovering the research based development of growth mindset, fixed mindset and STEM style challenges in the classroom. Participants will be given the opportunity to participate in a locked box and escape room style challenge with each other and uncover the hidden treasures to use in the classroom tomorrow.

*This learning opportunity is being offered through curriculum implementation funding from Alberta Education.*

## Presenters

**Tracy Wood**

was born and raised in England, and moved to Canada in 2001. She has worked mostly in specialized programs and with diverse learning students who show difficulties with self-regulation, executive functioning, cognitive delay, and anxiety. Tracy's teaching experience in Canada began at a school for students exhibiting severe behavior with students in grades 6,7,8 & 9 and then a congregated program for students who have cognitive delay K-6. While completing her MEd in Educational Technology and Curriculum Design, she became a District Diverse Learning Teacher (DDLT) for Calgary Catholic School Division. Her current research topic and passion is neuroscience, how it affects learning, and how can we as educators create a climate of success for all students.
