Program

TARGET AUDIENCE: GRADE 7-9 JUNIOR HIGH TEACHERS ARE ENCOURAGED TO ATTEND

Imagine, for a moment, you look around your Junior High/High School classroom and every student is completely engaged in a book of their choice. When it is time to drag them away from their books, they thoughtfully choose a 'Theme Response Book' to write about the connections they noticed. Think you're dreaming? This could be your new reality! Join us, following Penny Kittle's full day session in Calgary on April 12th, to continue exploring 'why students won't read what we assign'. Leave with additional knowledge and ideas as to how to 'nurture independent readers in a classroom community'. Join us to experience practical and effective methods, learn from experienced teachers and engage in conversation with colleagues as to how we can increase our teens time spent reading

This learning opportunity is being offered through curriculum implementation funding from Alberta Education.

Presenters

Sonja Howatt

has been working for Canadian Rockies Public Schools for twenty years. During this time, Sonja has coordinated and ran an Outreach Program focused on at-risk youth. She also initiated and led the summer school program for several years. Sonja was seconded to the school board for two years and in this role was able to travel to Finland and Norway as part of OECD conferences that addressed how to prepare our youth for this exponentially changing world. Currently, Sonja teaches grade 8 social studies and language arts and is interested in how to support students that

struggle with literacy at this level. She also had a key role in developing a new report card using competencies.
